

RockOn! 2014

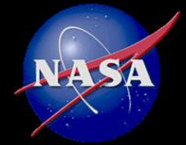

The Next How To Workshop

June 21 – 26, 2014
Wallops Flight Facility

Register by May 2, 2014 at
spacegrant.colorado.edu/rockon

The RockOn workshop is the next step beyond BalloonSats. During the workshop, teams of 3 build a sounding rocket payload from a kit in three days and launch it into space on the fifth day. Since 2008, 240 people have participated in the RockOn workshops and successfully built and launched 79 payloads to space. The hardware in the kit may be used on future RockSat (and possibly CubeSat) flights. NASA's Wallops Flight Facility will again be providing the rocket (two stage Terrier-Orion) and launch operations during the 2014 workshop. This hands-on workshop is about learning to build sounding rocket payloads, not rockets. RockOn is supported by the Colorado and Virginia Space Grant programs with significant cost sharing from Wallops and NASA Education. In celebration of the 7th RockOn workshop, registration for 2014 will be \$799 if you register by April 4, 2014 (\$849 after), which includes kit hardware (that teams take home), breakfast and lunch each day plus one dinner, t-shirt, handbook, software, and more plus a priceless experience. For more information on the workshop, please visit the website.
